

## Prices for US customers

Tariffs imposed on products entering the US has increased the cost of sales to US customers. Regrettably this additional cost cannot be absorbed by Simple Mechanical Solutions Ltd as prices are already as low as they can be. Therefore the cost increase must be passed on to US customers.

Prior to shipping from Canada to the US the tariff, or duty, must be prepaid as explained by this [page on the Canada Post website](#)

Once an order is received the applicable tariff will be calculated using the prescribed ZONOS app and the applicable tariff added to the order value.

For example, tariffs on an Economy 6 Pack with the contents pictured above are \$32.64 CAD

Effectively this increased the cost of an Economy 6 Pack from \$77 CAD to \$109.64 CAD (before Canada Post charges)
